SUPPORT PACKAGE UPGRADE

SUMMARY:

This article explains how to perform the SUPPORT PACKAGE UPGRADE.

AUTHOR:

K.VENKATA RAMU.

COMPANY:

WILLSYS INFOSYSTEMS Pvt. Ltd.,

CREATED ON:

20th Apr 2015.

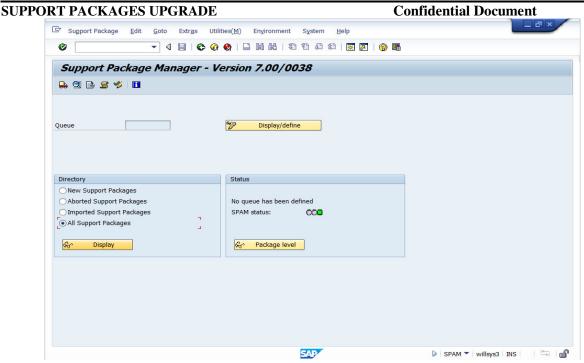

SCITORIT MERMOES CI GRADE

SUPPORT PACKAGES UPGRADE

Pre-requisites for applying Support Package:

- > Support packages should be always applied in **client 000** with like **DDIC User**.
- > Ensure that STMS is configured in client 000.
- Ensure that 2 free back ground process (work) are available (at least).
- > Sap packages are incremental. Jumping between packages is not allowed i.e after applying 9then only 10 can be applied.
- > Ensure that you have enough space in the database. Execute DB02 to check the size of each tables space and ensure that each one below 90%
- > Ensure that RDDIMPDP, RDDNEWPP background jobs are scheduled in 000 client to apply support packages.
- > Execute transaction **SPAM** and see if any previous Support Package import is incomplete. You can proceed ahead unless the previous support package import is successful.
- > Ensure that there is enough space in the transport directory. The transport directory is located at /usr/sap/trans
- ➤ Check your current SAP Support Package Level from transaction SPAM.

STEP 1:

Copy the Support Packages Into trans Directory and 'cd/usr/sap/trans'.

```
[root@willsys3 ~]# cd /oracle/IMPL/supportpacks/
[root@willsys3 supportpacks]# ll
